

TECHNICAL DATA SHEET

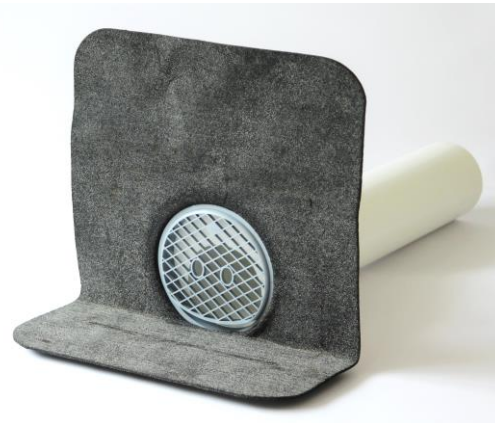

FASTFLOW through-wall rainwater outlet for bituminous flat roofing

Rainwater outlets designed for use with bituminous flat roofing systems in refurbishment applications.

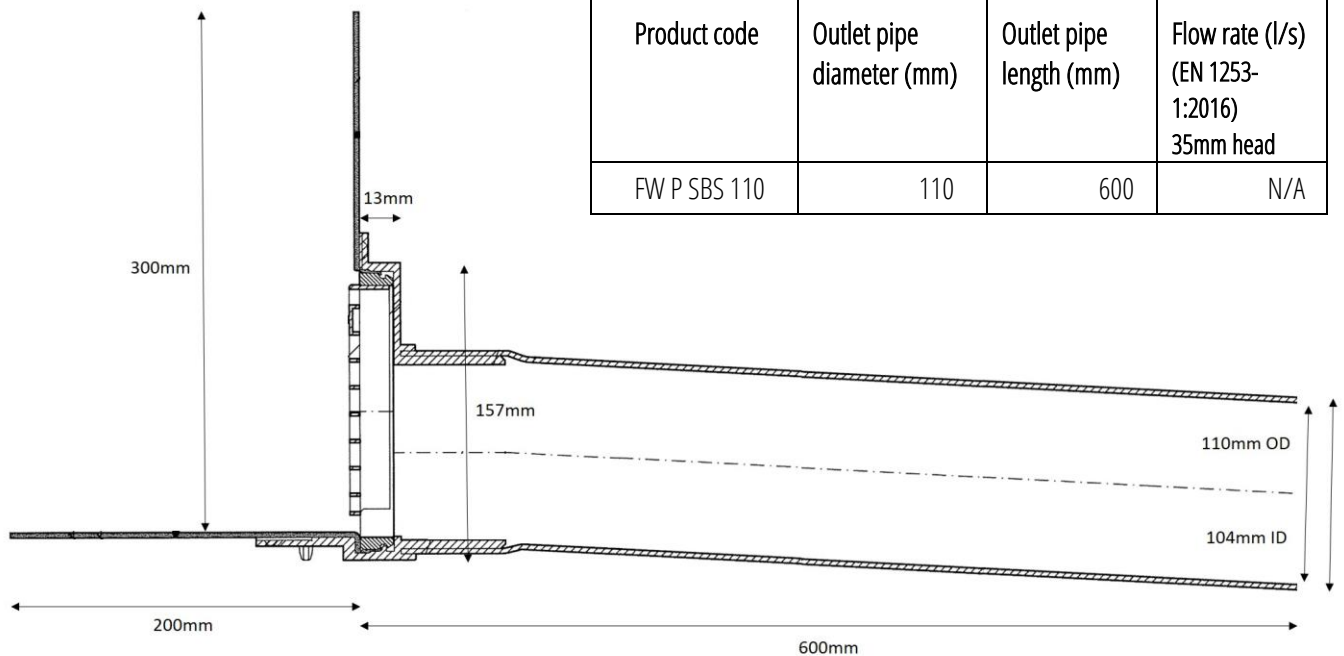

With a 600mm length pipe for one piece through wall applications, these Fastflow SBS rainwater outlets are manufactured from robust polypropylene with a torch-on SBS bitumen flange. The flange size is 400mm x 500mm, giving a large bond area and making them very quick and simple to install.

BENEFITS

- Very quick and easy to install
- 600mm length x 110mm diameter pipe for through wall designs
- Robust torch-on bituminous flange
- Leafguard design reduces blockages from leaves
- Pipe is robust and does not dent, yet is easily cut
- Polypropylene pipe helps to reduce condensation
